

I most strongly appose any exemptions to the "do not call list". Including small business phones.

I have been harased by AT&T as much as 6 times a week and have recieved over 100 calls from them at all times. AT&T is the worst tele-marketer!!!

I pay for a phone line for my use! not spamming tele-marketer's!  
I run a small mom and pop business and see no reasion for the FCC to allow teli-marketer's to continue there relentless harasment.

I shall also contact my congress represenatives urgering stonger legislation if the FCC can not put the American people first, above special interest groups.
